of a Latin Dictionary, suited to English and tender Capacities is (in brief) the Translating of Latin into English first turning of English into Latin (some Grammatical foundation being presupposed) without the help of other Books.

In answer to this Design it should confift of two parts; One containing all Words (both Appellative and Proper) all Idioms and Phrases used in the latin Tongue, with apposite English ( with the hardest of their Genitives) fuited thereunto; The other containing all kind of Words, Terms of Art and others. and Phrases used in the English Tongue,

with proper Latin suited to them; and both in an Alphabetical Order: because that is most suitable to the weak-

est Capacities, and is not (in the least) prejudicial to the strongest. Having therefore (as to this general

Defign) observed what is amiss, superfluous and wanting in others: That Retrench and Supply.

In the Latin part, many Words and Phrases are much more properly rendred than they were in any other; and where a fingle word could conveniently be had, we chose it rather than a long and redious Periphrafis.

We have not heapt up Synonyma's, but yet took carethat Words (especially the Primitives) should have the whole variety of their several fignifications. them. Such uleful Explications, Directi-

ms and k eferences as were wont to be Latin, are here in plain and intelliible English. But such Latin Explicalions as were afterwards repeated again nEnglish, we judged a needless vani-

HE proper Use and Defign I ty, and therefore have omitted them. We have also omitted tedious Erymologies, which (for the most part) depended meerly upon Conjectures, and were of little or no Use at all to Chil-(as being the easiest,) and then the dren; but have given them where they are plain, and rationally to be deduced; how carefully they have been confidered, and how well performed, we refer to the judgment of the Learned.

The quantities are here made more complete, by being placed over initial Vowels, as well as other Syllables.

Many Phrases and Proper Names are added from Calepine, Ferrarius The method also of Calepine is here

observed in placing all (both Common and Proper ) in an Alphabetical order. Which cannot be blamed by any that confiders the great conveniency of dispatch in the search of any thing required, the natural dependency of one upon another, the many Repetitions and References that were wont to be made we have here endeavoured to Rectifie, from one to another, and are all by this method saved.

But that method of Calepine and others after him ( who wrote for Men ) in placing the Derivatives all under their Primitives, is not (in the least) to be followed by those who pretend that they condescend to the lowest capacities. For they are sometime so strangely changed, that it puzzles an experienced judgment where to look In the English part, the Corrections

are so many and so great, as would take up too much Time and Room to relate. Thousands of Words, Particles, Idioms, Phrases and Proverbs are added. Together with the whole body of Fro-

per Names, not only of Men and Women, and places here in England ( fo far as could be procured ) but also the Modernmames of Foreign Countries, Islands, Mountains, Cities, Rivers, and other noted Places, especially in Europe, as France, Germany, &c.

Some obsolete Words and uncouth Phrases are among the rest, because we are to suppose the very worst that any one can have occasion to turn into Latin, without intending the English for use. For as in the Latin part only the English, so in the English part only the

Latin is to be propos'd for imitation. And the want of this confideration gave occasion to many mistakes in other works of this nature.

Nouns, and Preter-tenses of Verbs are here ( to our utmost ) observed. Together with such English Substantives. as are also taken and used as Adjectives, than which there is hardly any thing more common, yet nothing less regarded, or more needful to be understood.

And all in a regular and alphabetical

His gold By the Bookseller.

His Book hath sufficiently commended it self to the World by the Sale of **L** almost 4000 in less than two years time.

There is lately Published by the same Author Mr. Elisha Coles, and fold by Peter Parker at the Leg and Star in Cornbill.

An English Dictionary: Explaining the difficult Terms that are used in Divinity, Husbandry, Physick, Philosophy, Law, Navigation, Mathematicks, and other Arts and Sciences. Containing many thousands of hard Words (and proper names of Places) more than are in any other English Dictionary or Expositor. Together with the Etymological Derivation of them from their proper Fountains, whether Hebrew, Greek, Latin, French, or any other Language. In a Method more comprehensive, than any that is extant.

Intended for the help of such as understand not the Latin, and other learned Languages, that they may arrive at a competent Knowledge to read and write English with the greater judgment and Certainty.

tle Dictionaries within the greater. Which was far from being fuited to the common use of Schools or Childrens capacities. Because it supposed in them not only a Manly judgment. but a judgment Philosophical. For unless they know beforehand what the thing is, or what General Head it is under, they must of necessity fearch all those perty Dictionaries, or at least look so long till they find. But a little experience will practically demonstrate the usefulness of our Me-

I think there is none can object the The English irregular Plurals of smalness of the Character, who confiders, that it is intended for young eyes, in the perufal of a word or two, and not to be pored on as a continued diff. course. But especially confidering how much is comprized in fo little room, that it might be much more Portable and far less chargeable than
